

URGENT CALL FOR ABSTRACTS/SPEAKERS

12/02/2012

Dear Colleagues

From Wednesday 20/06/12 until Saturday 23/06/12, the “*Belgian Hand Group*” (hand surgeon’s society) is organizing the FESSH hand congress in Antwerp, Belgium.

The “*Belgian Hand Therapists*” are organizing 1 scientific day about hand therapy during this FESSH congress at the same location! We know that this call for papers is early, but we were asked by the surgeon’s to make up a preliminary program by the end of Mars.

Antwerp is a perfect location for a congress because of its central position between Germany, the Netherlands, France and the United Kingdom. It’s has an airport (direct flight to London and Manchester), fast connection to Brussels airport, a modern international railway station,...

In addition, Antwerp historically strongly related to the hand!

For such an event, we are looking for strong speakers who can augment the level of this day. You will be able to follow the rest of the FESSH congress and visiting Antwerp.

The main topic of the FESSH-congress is the fore-arm. If you are conducting research about the “fore-arm” or the wrist (factures, nerve injury, muscle injury, tendinopathy, tendon injuries, DRUJ – PRUJ, CRPS, Volkmann's contracture,...) and you would be interested to share your findings on an European-level congress please contact us!

antwerp2012@bht.be

If you are interested to speak at this congres please submit an abstract for oral, poster presentation or instructional course until 10/03/2012Kind regards

Paul De Buck
International delegate B.H.T.

Tom Lattré
Président B.H.T.
